

Table of Contents

Introduction	1
Getting Started.....	3
Check Local Codes and Permits	3
Plot, Plan and Design	5
Creating a Scaled Sketch of Your Yard	5
What to Make a Note of	6
Determine Your Soil Type	7
Evaluate the Results.....	7
How Much Water and Pressure is Available.....	8
Static Water Pressure	8
Dynamic Water Pressure	8
Calculating Dynamic Water Pressure.....	9
Selecting Sprinkler Heads.....	11
Factors to Consider When Choosing a Sprinkler for a Specific Area	11
The Main Types of Irrigation Sprinklers.....	12
Spray Heads.....	12
Rotors.....	13
Impact Sprinklers	14
Drip Irrigation.....	15
Sprinkler Placement.....	17
Irrigation Zoning.....	21
Determining the Number of Zones	22
Zone Flow Rates	23
Placing & Locating Main Components.....	25
Valve Placement.....	25
Main Line Placement	26
Placing Lateral Pipe	27
Installing Your Sprinkler System	29
Tools Required	29
Installation Procedure.....	30

Solvent Welding Pipe	31
Installing the Lateral Lines	32
Trenching	33
Trenching by Hand	33
Trenching Using a Trencher	34
Going Under Obstacles	35
Installing the Pipe.....	36
Swing Joint or Swing Arm Risers	37
Flexible Swing Arm.....	37
Rigid Swing Arm	37
Cutting in the Sprinkler Tee Junctions	38
Fittings Required for The Job:	39
Pre-made Swing Arm	39
Rigid Swing Arm	39
Manifold Installation Procedure	40
Manifold Types.....	41
Solenoid Control Valve.....	42
Irrigation Control Wire.....	43
Valve and Controller Wire Installation.....	44
Control Wire installation.....	44
Controller Installation	45
Flushing and Sprinkler Installation.....	46
Backfilling.....	46
Testing.....	47
Freezing Areas.....	47
Authors Message	47
Appendix	49
Appendix 1: Pressure loss table PVC class 200 pipe	49
Appendix 2: Graph Paper	51
Glossary of Terms.....	53
Table of Figures.....	61
